Although we wouldn't recommend stockpiling car batteries, you should plan ahead. Get a battery tester and use it from time to time. A good battery should last around five years. In an ideal world, you don't want to have to revert to a jump starter. They can put a bit of stress on a battery and alternator. However, a lot of the capable ones out there are quite high. Usually, they'll have two. One for the engine and driving amenities, and a leisure battery for the camping amenities, such as the cooker and so on. Ideally, you want a capable leisure battery.
